

Assembly Instructions

Mounting Your Artwork in a Floater Frame

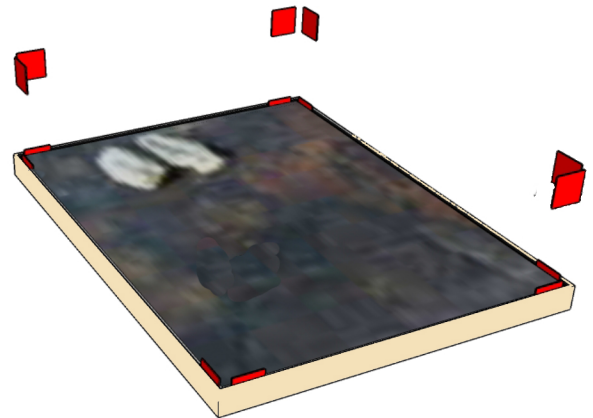

1. You will need a Phillips head screwdriver and a piece of heavy paper or cardboard (not corrugated).

2. Place the floater frame face up on your table, the pre-drilled holes in the frame should be on the bottom, against the table.

3. Put your artwork in the frame with even spacing all the way around.

4. Put tabs of cardboard (shown in red) snugly all around the painting; it should stick out a bit for later removal.

5. Flip the frame & painting over. Insert all the provided 3/4" truss-head phillips screws into all the pre-drilled holes of the frame. To keep them even, attach them all part way, then go back and snug them.

6. Flip frame; remove cardboard
